Use of SCN features: No

Actual Values

Gulf Selected Samples prediction using Gulf training set, Learning with selected samples classes with no low regional training instances, no extra training categories, No Calanoida, Cyclopoida, Zooplankton classes in learning set

Max learning objects: 5000 objects/class Strategy N° 3

Confusion Matrix - In percent of Actual Value

Classification Report Matrix max 5000 learning objects per class

precision recall f1-score
